Cal-Mag® Complex

With 1,000 IU of Vitamin D₃!

Item # 3404
150 tablets

Recent studies have suggested that over 60% of us do not get the recommended 400 IU (RDA) of Vitamin D. And the latest scientific studies show that we need even more vitamin D than previously recommended for optimal heart health, immune function, and long term breast health. These roles are in addition to the critical contribution vitamin D provides towards bone health.

GNLD introduces another cutting-edge product reflecting the latest in scientific discoveries!

Calcium And Magnesium With High Potency Vitamin D₃

- Adequate calcium and vitamin D as part of a healthy diet, along with physical activity, may **help reduce the risk of osteoporosis** later in life
- Calcium and magnesium, necessary for strong bones and teeth, are also critical for **cardiovascular health, normal blood pressure, nerve and muscle function, PMS and many enzyme reactions***
- Vitamin D supports **breast, bone, heart, and immune health***

The GNLD Difference

- Now with 1,000 IU of vitamin D₃, the form that is readily absorbable and highly bioavailable
- Exclusive double amino acid chelation to promote higher calcium and magnesium absorption
- Formulated with the preferred 2:1 ratio of calcium to magnesium
- Easy-to-swallow coated tablet
